

Understanding Your Vial Label

What is on your vial label

Your pharmacy label shows the concentration of your medication.

Example label:

Semaglutide 1.25 mg / 0.5mg / mL

This means:

- Every 1 mL of liquid contains
- 1.25 mg of semaglutide
- 0.5mg of B12

The vial contains medication dissolved in liquid.

Example:

If your vial contains: 1.25 mg of semaglutide per 1 mL

VOLUME	MEDICATION
1 mL	1.25 mg
0.5 mL	0.625 mg
0.25 mL	0.3125 mg

Pharmacy Instructions & Vial Concentration

Your Medication Concentration

The vial contains **1.25 mg** of Semaglutide per every 1mL of solution.
